

Private Cloud

Private Cloud backed by enterprise grade infrastructure, engineers who understand your requirements & 24/7 support.

Adelaide's specialist provider of enterprise grade network, VoIP, private cloud and hosting services

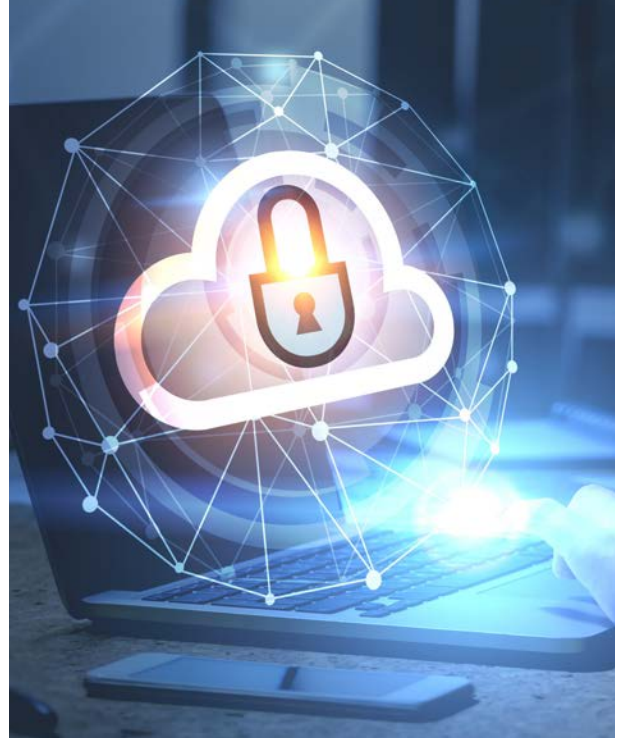

Private Cloud

Highly available, scalable, always on virtual infrastructure

Private Cloud can be a single Virtual Private Server, some Cloud Storage, a Hybrid Cloud which extends your own on-premises infrastructure through to a full cloud based infrastructure. A well-designed private cloud infrastructure frees you of the hassles of owning and maintaining your own servers while protecting you against disaster and enabling you to adapt to changing requirements and technologies.

Our Private Cloud services have been built from the ground up to provide highly available, scalable, always on virtual infrastructure that you can rely on to deliver the performance and up time demanded by today's IT driven world.

Services

Virtual Private Networks

Your own private, isolated Virtual Private Network for your Private Cloud hosted servers, internet, VoIP and connectivity to your office.

Hosted Servers

Virtual Private Servers hosted on Hyper-V or KVM in our Private Cloud. Full support for Microsoft Windows, RedHat, CentOS, FortiGate, 3CX and many more.

Hosted Desktops

Secure, managed and highly available user work desktop environments hosted in our Adelaide Private Cloud accessible anywhere, any time.

Storage

Fast, scalable, enterprise grade storage delivered to your Virtual Private Servers or as an iSCSI target for use on-premises or in the data centre.

Application Hosting

Customised Adelaide based hosting environments from small scale web apps to very large Windows and Web Based applications.

Web Hosting

Fast and Adelaide based Website Hosting on Microsoft Windows or Linux supporting ASP.NET, PHP, WordPress, MySQL and many more.

Offsite Backup

Secure and scalable object storage in Adelaide for offsite backup compatible with most software products and appliances.

Key benefits

✓ Secure

Built from the ground up with security in mind from the edge of the network, to the storage and hypervisors right down to secure Adelaide Data Centre facilities. We think security first.

✓ Reliable

Every part of our Private Cloud infrastructure is protected against failures including the hosts, network, storage and Data Centre facilities.

✓ Engineered

Not only are our people experts in the technologies used to build our Adelaide Private Cloud, but we're fully versed in all types of network requirements. We can help you design, build and run everything from web servers, to clustered application hosting environments through to a full corporate network on Microsoft Windows or Linux.

✓ PAYG or Resource Reservations

Pay for CPU, RAM, Storage and Network only when you use them or reserve a fixed amount of capacity and receive significant discounts. Our transparent pricing structures eliminate the risk of Public Cloud bill shock.

✓ Data Sovereignty

Everything we do is Adelaide based. Your data and resources are all located in Adelaide based Data Centres and subject to South Australian laws keeping you compliant with your data sovereignty requirements.

✓ Full Control

Create, manage, delete and control your resources on demand using our control panel and HTTPS REST API.

✓ Your Data

Your data is your data. We'll never access it and you're entitled to ask for a copy any time - no exceptions. It's built into our service agreement. Data access is highly restricted, controlled and audited.
